The Association of Chartered Certified Accountants (ACCA) is the global body for professional accountants. With over 100 years of providing world-class accounting and finance qualifications, the ACCA has significantly raised its international profile in recent years and now supports a BSc (Hons) in Applied Accounting and an MBA.BPP Learning Media is an ACCA Official Publisher. P2 is a very challenging paper which builds on the knowledge and skills acquired at earlier levels in the preparation and analysis of financial reports for single entities and groups. It takes these areas to a higher level, putting into context the role of the accountant as a professional steward and adviser, who is responsible to the stakeholders of an organisation. It has five main sections: 1. Regulatory and ethical framework and current issues 2. Reporting the financial performance of entities 3. Group financial statements 4. Specialised entities 5. Analysis of the financial performance of entities The main new topics introduced at this level relate to group accounts, but other topics are tested with a different emphasis and in more depth than at the Fundamentals Level. We provide material for both International and UK streams. The study text has been reviewed by the examiner and takes account of his advice on approaching the paper. Ethics, which have an impact on all aspects of financial reporting, are introduced at an early stage in the text, as is corporate social responsibility, so that students do not neglect these topics when covering the numerical areas. Accounting standards come next, combining revision with extension into more advanced areas. After a brief revision of basic groups, the more advanced consolidation topics are covered. Current issues are covered throughout the text within the appropriate topics, and also summarised towards the end of the book. The question bank contains practice at the case study-style question you will encounter in the real

exam. BPP Learning Media is the publisher of choice for many ACCA students and tuition providers worldwide. Join them and plug into a world of expertise in ACCA exams. The 43 papers in this collection, originally published from 1972 to 1987 delve into accounting, observing and exploring its functioning. They construct a basis for interrogating it in use and indeed they attempt to account for accounting. The author seeks to understand accounting, to appreciate what it is, what it does and how it does it, examining it from without rather than from within. 'A consultative document with proposals for reform of provisions of the Companies act and codes' - Cover. A professional perspective to implementing IFRS 10, 11, and 12 The new International Financial Reporting Standards (IFRS) 10, 11, and 12 are changing group accounting for many businesses. As business becomes increasingly global, more and more firms will need to transition using the codes and techniques described in Principles of Group Accounting under IFRS. This book is a practical guide and reference to the standards related to consolidated financial statements, joint arrangements, and disclosure of interests. Fully illustrated with a step-by-step case study, Principles of Group Accounting under IFRS is equally valuable as an introductory text and as a reference for addressing specific issues that may arise in the process of consolidating group accounts. The new international standards will bring about significant changes in group reporting, and it is essential for accountants, auditors, and business leaders to understand their implications. Author Andreas Krimpmann is an internationally recognized authority on the transition from GAAP to IFRS, and this new text comes packaged with GAAP/IFRS comparison resources that will help make the changes clear. Other bonus resources include an Excel-based consolidation tool, checklists, and a companion website with the latest information. Research Paper (undergraduate) from the year 2008 in the subject Business economics - Business Management, Corporate Governance, grade: 1,3, University of applied sciences, Munich, language: English, abstract: Due to a regulation of the European Union (EU) concerning financial accounting issued on June 6th, 2002, all listed companies in EU are obligated to provide their Consolidated Financial Statements (CFS) in accordance with financial accounting principles of International Accounting Standards (IAS) or International Financial Reporting Standards (IFRS) from January 1st, 2005. This regulation enables a

necessary harmonization of accounting principles within the EU and supports a clear comparability of CFS worldwide. The object of this study is to analyze major differences of CFS in German GAAP and IAS/IFRS. Thereby, variations of both accounting standards are compared and a major difference is explained thoroughly with a concrete example. The major differences of CFS in IAS/IFRS and German GAAP result from different aims of both accounting standards. The German GAAP is strongly based on prudence principle for protection of creditors and authoritative principle (tax accounting based on commercial accounting). In comparison, the IAS/IFRS deliver potential investors realistic and decision useful information about assets, finance, and profit situations of a company (true and fair view / fair presentation principle). These basic principles could be reflected in several key points of the both accounting standards whose differences are clarified in this study. Furthermore, an essential key point of CFS namely the basis of consolidation (contains enterprises included in the consolidation and capital consolidation methods) is illuminated with a concrete example. Hereby, the relation between the control influence of the parent enterprise on its "sub-entities" and the correspondent capital consolidation methods are studied. New UK GAAP 2015 provides a comprehensive guide to interpreting and implementing the new UK accounting standards, particularly: FRS 100 – Application of Financial Reporting Requirements; FRS 101 – Reduced Disclosure Framework – Disclosure exemptions from EU-adopted IFRS for qualifying entities; and FRS 102 – The Financial Reporting Standard applicable in the UK and Republic of Ireland. This book is an essential tool for anyone applying, auditing, interpreting, regulating, studying or teaching these new accounting standards. Written by the financial reporting professionals from the Financial Reporting Group of EY, this book provides a clear explanation of the new accounting requirements which are mandatory for 2015, and will prove invaluable in implementing these new requirements. It also addresses the requirements of the UK Companies Act and relevant statutory instruments, as well as practical

worked examples. Also available is International GAAP 2015® – a three volume comprehensive guide to interpreting and implementing IFRS, setting IFRS in a relevant business context and providing insights into how complex practical issues should be resolved in the real world of global financial reporting. In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, *The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution* includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at www.worldbank.org/globalfindex. The second edition of *Accounting in the Business Environment* continues to meet the growing need for a more relevant approach to accounting in the modern world. The author is

concerned to show that accounting is as much about judgements as facts and as much about influencing as informing. The book explains the historical development of accounting in Europe and explores the cultural and structural differences that exist in financial reporting between member states of the European Union. This extends to a discussion of group accounts and accounting for multinational enterprises - all features that lend a marked international perspective to this book. Accounting in the Business Environment is written for undergraduate students on courses with an accounting content, particularly those with an international or European perspective. It is also suitable for postgraduate students of business administration and management. Financial Accounting: Group statements is a financial accounting textbook covering the topic area 'Group statements' which is an integral part of the syllabus at second and third year. 'Group statements' refers to the consolidated financial statements of a holding or parent company as well as its subsidiaries and provides information on the overall financial standing of the group of companies. Mastering Group Financial Statements Volume 2 is part of a two-volume set which provides accounting students and practitioners with an invaluable practical guide to the often-complex world of group accounting. The publication gives detailed explanations and numerous practical worked examples, to provide readers with a comprehensive overview of the principles and concepts of International Financial Reporting Standards (IFRS) that underlie group accounting. It therefore serves as a roadmap for preparing group financial statements in varying scenarios in accordance with IFRS. Volume 2 is an essential resource for understanding the application of IFRS to business combinations, investments in associates and joint arrangements, changes in ownership interests in investments, foreign operations and the group statement of cash flows. (Black & White Version) A much-awaited compendium on Contemporaneous Accounting for Business Combination and Group Accounts. This piece depicts the idiosyncratic view and perspective of the author and the materials have

gone a long way to demystifying the salient issues and practical scenarios in accounting for Business Combinations in accordance with IFRS 3 (Revised) and also on preparation and presentation of Group Accounts with respect to IFRS 10 and lots more. This is an output of over 9 years research and documentation of methodologies that best explain the basic concepts, mechanics, and principles that underlie the accounting for business combinations in the modern age of seeking growth through "Mergers and Acquisition," rather than through "Organic growth." The book is meant to cover the knowledge gaps identified and demonstrated by students, practicing accountants and professionals on the most appropriate accounting for all forms of business combinations (including acquisitions, mergers, statutory mergers, integration absorption, true mergers, etc.) and the subsequent requirement to present group accounts for business combinations that result in "Parent-Subsidiary Relationship." This book is invaluable and useful for professional accountants, auditors, academicians, researchers, professional students, business owners, and tertiary institution students. This represents my give back to the profession and the society, so as to promote best practices and uphold the accountancy and finance profession in its entirety. Now firmly established as "the" leading text in the field, "Comparative International Accounting" takes a comprehensive look at the international dimensions of financial accounting and reporting. The book, which includes contributions from a diverse group of international practitioners and academics, has been carefully shaped into a coherent whole. This ninth edition has been extensively rewritten and fully updated to incorporate the latest developments in the field, especially the adoption of international standards in many countries. Features Broad overviews supported by detailed information on real countries and companies; Across-the-board comparisons of major topics; Examination of the requirements of International Financial Reporting Standards and of US GAAP; Studies of accounting in Japan and China. New to this edition Six brand new chapters have been added, including chapters on the regulation

of accounting and the politics of standard setting; Separate consideration of group accounting by listed companies and of individual company accounting under domestic rules; More coverage of the impact of accounting differences on capital markets and on analysis; Instructors' resources include an expanded Suggested Answers section in the back of the book. Also, in addition to an Instructor's Manual, unique PowerPoints for each chapter are now available online as well as links to real financial statements. "Comparative International Accounting" is ideal for students at both undergraduate and postgraduate levels taking courses in comparative and international accounting. Christopher Nobes is PricewaterhouseCoopers Professor of Accounting at the University of Reading, UK. From 1993 to 2001 he was a representative on the board of the International Accounting Standards Committee. Robert Parker is Emeritus Professor of Accounting at the University of Exeter, UK. He was formerly editor of the journal "Accounting and Business Research." Both authors have received the American Accounting Association's award of 'outstanding international accounting educator'. Seminar paper from the year 2004 in the subject Business economics - Accounting and Taxes, grade: 1.7, University of Bayreuth (School of Law, Economics and Business Administration), course: 'business taxation and auditing' , 35 entries in the bibliography, language: English, abstract: Huge changes arose in the world of economy during the last decade. Due to globalisation and competition for scarce capital a heightened discussion regarding different national accounting policies emerged. There has been an intensive controversy between continental-European and Anglo-American based accountancy. All companies listed on a stock exchange in the EU are obliged to present their group accounts in accordance with IAS/IFRS2 from 2005 on. One crucial aspect of IRFS focuses on the increasing tendency to recognise a fair value which

implies a departure from historical cost-based financial statement to a rather market value-based one. Subsequently, this paper introduces and compares the current valuation bases of the German commercial/tax law and IFRS. Because of the increasing importance of IFRS the major point reflects this consideration. Finally, contrasts will be emphasised and opportunities for a complete takeover of an advanced fair value accounting to German accountancy will be examined. For this reason a reference to the general objectives and principles both of the accountancies is inevitable and will be introduced in either case.
