The central purpose of this collection of essays is to make a creative addition to the debates surrounding the cultural heritage domain. In the 21st century the world faces epochal changes which affect every part of society, including the arenas in which cultural heritage is made, held, collected, curated, exhibited, or simply exists. The book is about these changes; about the decentering of culture and cultural heritage away from institutional structures towards the individual; about the questions which the advent of digital technologies is demanding that we ask and answer in relation to how we understand, collect and make available Europe's cultural heritage. Cultural heritage has enormous potential in terms of its contribution to improving the quality of life for people, understanding the past, assisting territorial cohesion, driving economic growth, opening up employment opportunities and supporting wider developments such as improvements in education and in artistic careers. Given that spectrum of possible benefits to society, the range of studies that follow here are intended to be a resource and stimulus to help inform not just professionals in the sector but all those with an interest in cultural heritage. This volume provides the most current research on smart cities. Specifically, it focuses on the economic development and sustainability of smart cities and examines how to transform older industrial cities into sustainable smart cities. It aims to identify the role of the following elements in the creation and management of smart cities:• Citizen participation and

empowerment • Value creation mechanisms • Public administration • Quality of life and sustainability • Democracy • ICT • Private initiatives and entrepreneurship

Regardless of their size, all cities are ultimately agglomerations of people and institutions. Agglomeration economies make it possible to attain minimum efficiencies of scale in the organization and delivery of services. However, the economic benefits do not constitute the main advantage of a city. A city's status rests on three dimensions: (1) political impetus, which is the result of citizens' participation and the public administration's agenda; (2) applications derived from technological advances (especially in ICT); and (3) cooperation between public and private initiatives in business development and entrepreneurship. These three dimensions determine which resources are necessary to create smart cities. But a smart city, ideal in the way it channels and resolves technological, social and economic-growth issues, requires many additional elements to function at a high-performance level, such as culture (an environment that empowers and engages citizens) and physical infrastructure designed to foster competition and collaboration, encourage new ideas and actions, and set the stage for new business creation. Featuring contributions with models, tools and cases from around the world, this book will be a valuable resource for researchers, students, academics, professionals and policymakers interested in smart cities. This book focuses on various challenges, solutions, and emerging technologies in the operation, control, design, optimization, and protection of microgrids in the presence of hybrid renewable energy sources and electric vehicles. This book provides an insight into the potential applications and recent development of different types of renewable energy systems including AC/DC microgrids, RES integration issues with the grid, electric vehicle technology, etc. The book serves as an interdisciplinary platform for the audience working in the focused area to access information related to energy management, modeling, and control. It covers fundamental knowledge, design, mathematical modeling, applications, and practical issues with sufficient design problems and case studies with detailed planning aspects. This book will serve as a guide for researchers, academicians, practicing engineers, professionals, and scientists, as well as for graduate and postgraduate students working in the area of various applications of RES, Electric Vehicles, and AC/DC Microgrid. . This two-volume open-access book offers a theoretically and empirically-grounded portrayal of the experiences of people claiming international protection in Europe on the basis of their sexual orientation or gender identity (SOGI). It shows how European asylum systems might and should treat asylum claims based on people's SOGI in a fairer, more humane way. Through a combined comparative, interdisciplinary (socio-legal), human rights, feminist, queer and intersectional approach, this book examines not only the legal experiences of people claiming asylum on grounds of their SOGI, but also their social experiences outside the asylum decision-making framework. The authors analyse how SOGI-related claims are adjudicated in different European frameworks (European Union, Council of Europe, Germany, Italy and UK) and offer detailed recommendations to adequately address the intersectional experiences of individuals seeking asylum. This unique approach ensures that the book is of interest not only to researchers in migration and refugee studies, law and wider academic communities, but also to policy makers and practitioners in the field of SOGI asylum. The workplace is where almost two thirds of adults spend almost two thirds of their waking time. Though traditional, statutorily-driven approaches to risk management have been demonstrably effective in reducing the number of injuries and sickness in recent years, psychological and physical health issues are still rife in the modern-day workforce. Work-related sickness and injury absence, and the economic cost implications of such, are having a detrimental effect not just on employees and employers, but on the wider community. Written by a team of experts from across academia and practice settings, this engaging new book argues that employer organizations must work collaboratively with employees in order to create working environments that promote health for all. With a sharp focus on applying theory to practice, the book uses

real-life examples from areas across the globe to encourage readers to think contextually. Key topics covered include: - Work-life balance, including issues of workload and the 'long hours culture' - The impact of work-related musculoskeletal disorders - The nature, scale and causes of work-related stress - The significance of corporate social responsibility in employee wellness. Aligned with global frameworks, this comprehensive text provides both students and qualified professionals with a solid foundation for practice, and a rich source of material for discussion. These concise revision notes are aimed at candidates preparing for UK and international FRCS (Trauma & Orthopaedics) exit examination as well as the European Board (EBOT) and SICOT diplomas. The book has been written in an easy to read style, with a focus on being an exam candidate's companion for quick revision on the go. Candidates are usually caught between a busy job and the demands of these challenging exams. This book covers the depth and breadth of Trauma & Orthopaedics knowledge to help candidates sail through the Fellowship exit examinations. We have aimed to provide a high quality one stop concise knowledge bank to cover the whole syllabus of Trauma & Orthopaedics in a well organised bullet point style. This will provide a useful resource for both part 1 (MCQs, EMQs) as well as part 2 (Viva and Clinical) components of the exit examinations. It is an ideal companion to complement your preparation for the examination with the most useful information presented in the most succinct manner. The authors are senior members of the FRCS Mentor Group who have between them ample up to date experience and knowledge with the Fellowship examination. They have attended most postgraduate orthopaedic courses in the UK and internationally, and have reviewed all relevant exam book. They have excellent track records of helping many candidates to pass their exams. This book is complemented by hundreds of diagrams, illustrations, radiographs and clinical images. There are QR codes interspersed within the chapters which when scanned using your smartphone camera, link up to either the corresponding open-access seminal paper or to a YouTube video pertaining to the topic discussed. We look forward to the readers' feedback that will help us immensely to improve the contents in the next edition for the benefit of future orthopaedic aspirants. Head over to Amazon, Google Books and to BookAuthority.org to leave a review, or write to the email below. It is the book you need when dealing with the complex, the unexpected and the dreaded in anaesthetic practice. Die EU und ihre Mitgliedsstaaten formulieren in der Entwicklungspolitik ehrgeizige gemeinsame Prinzipien, die nationale Umsetzung hinkt aber oft hinterher. Welche Faktoren spielen dabei eine Rolle? Mit Frankreich, Deutschland und Spanien untersucht die Studie drei langjährige EU-Mitgliedsstaaten. Sie nutzt einen sozialkonstruktivistischen Normenansatz und entwirft ein Modell für das Verständnis der bislang oft unterbelichteten institutionellen Verankerung und Internalisierung internationaler Normen. In zwei Fallstudien werden Armutsorientierung und gebergemeinsame Ansätze untersucht. Auf Basis zahlreicher Interviews sowie umfassenden weiteren Quellen wird deutlich, dass sowohl länder- als auch fallspezifische Faktoren eine Rolle spielen. With the rise of information and communication technologies in today's world, many regions have begun to adapt into more resource-efficient communities. Integrating technology into a region's use of resources, also known as smart territories, is becoming a trending topic of research. Understanding the relationship between these innovative techniques and how they impact

social innovation is vital when analyzing the sustainable growth of highly populated regions. The Handbook of Research on Smart Territories and Entrepreneurial Ecosystems for Social Innovation and Sustainable Growth is a pivotal reference source that provides vital research on the global practices and initiatives of smart territories as well as their impact on sustainable development in different communities. While highlighting topics such as waste management, social innovation, and digital optimization, this publication is ideally designed for civil engineers, urban planners, policymakers, economists, administrators, social scientists, business executives, researchers, educators, and students seeking current research on the development of smart territories and entrepreneurship in various environments. This book addresses key topics related to organization design and knowledge management in the digital economy with organizational context, particularly in Asia. Asian nations are moving fast toward the digital economy, within which the role of organization design and knowledge management is crucial to support innovative and creative ideas for meeting huge market opportunities where customers are ready for digitalization. The book conceptualizes organization design into three dimensions, people, information, and technology, and offers readers a unique valued insight, bringing new perspectives to understanding emerging business opportunities and challenges in Asia. It presents a valuable collection of 14 chapters with empirical studies from leading researchers. The book addresses digital transformation in companies and organizations in Asia, analysing how disruptive technologies can help them have more efficient organization processes, create innovative products and services, be more resilient and achieve sustainable goals in the post-pandemic time. It fills a gap in the market offering a valuable collection of chapters that combines strategic topics for companies, organizations and nations today, such as digital economy, disruptive technologies, big data and knowledge management, with a specific focus on the Asian region, providing rich examples and studies focused in countries and regions within Asia. Written for scholars, researchers and other specialists in digitalization, this book offers a unique collection of insights into the current and future situation in Asia. As “market referees”, regulators contribute to the delivery of essential public utilities. Their organisational culture, behaviour, actions and governance are important factors in how they, and the sectors they oversee, perform. Mechanical Ventilation provides students and clinicians concerned with the care of patients requiring mechanical ventilatory support a comprehensive guide to the evaluation of the critically ill patient, assessment of respiratory failure, indications for mechanical ventilation, initiation of mechanical ventilatory support, patient stabilization, monitoring and ventilator discontinuance. The text begins with an introduction to critical respiratory care followed by a review of respiratory failure to include assessment of oxygenation, ventilation and acid-base status. A chapter is provided which reviews principles of mechanical ventilation and commonly used ventilators and related equipment. Indications for mechanical ventilation are next discussed to include invasive and non-invasive ventilation. Ventilator commitment is then described to include establishment of the airway, choice of ventilator, mode of ventilation, and initial ventilator settings. Patient stabilization is then discussed. This is one in a series of manuals for car or motorcycle owners. Each book provides information on routine maintenance and servicing, with tasks described and photographed in a step-by-step sequence so that even a novice can do the work. This edited collection provides an inter- and intra-disciplinary discussion of the critical role context plays in how and when individuals and groups remember the past. International contributors integrate key research from a range of disciplines, including social and cognitive psychology, discursive psychology, philosophy/philosophical psychology and cognitive linguistics, to increase awareness of the central role that cultural, social and technological contexts play in determining individual and collective recollections at multiple, yet interconnected, levels of human experience. Divided into three parts, cognitive and psychological perspectives, social and cultural perspectives, and cognitive linguistics and

philosophical perspectives, Stone and Bietti present a breadth of research on memory in context. Topics covered include: the construction of self-identity in memory flashbulb memories scaffolding memory the cultural psychology of remembering social aspects of memory the mnemonic consequences of silence emotion and memory eyewitness identification multimodal communication and collective remembering. Contextualizing Human Memory allows researchers to understand the variety of work undertaken in related fields, and to appreciate the importance of context in understanding when, how and what is remembered at any given recollection. The book will appeal to researchers, academics and postgraduate students in the fields of cognitive and social psychology, as well as those in related disciplines interested in learning more about the advancing field of memory studies. This second edition is designed to provide clinicians the necessary neurologic information for the diagnosis and management of these common neurologic problems. This text will be useful to all clinicians who evaluate patients who have neurologic problems. It will also be useful to medical students and residents in neurology, internal medicine, and psychiatry Effective work practices and good employee relations are a real necessity of nowadays organizations, as they can help to reduce absenteeism, turnover, organizational costs, conducting to high levels of commitment, effectiveness, performance as well as productivity. Addressing these questions, this book focuses on the implications of changes in productivity and organizational management, exploring models, tools and processes. Brazil has a long tradition of public policies and efforts to eradicate hunger and poverty. The right to food is enshrined in Amendment No. 64/2010 of Brazil's Constitution as an obligation of the State, and the country has a very progressive food security law that institutionalizes the policy and lays the foundations for broad-based social participation in priority setting, expressed in the National Council on Food and Nutrition Security (CONSEA). It was this wealth of experience (reflected in programmes and plans such as Zero Hunger, Bolsa Família and Brazil Without Extreme Poverty, applied nationwide from 2003 to 2013), together with other factors, that took the country off the Hunger Map in 2014. This report is designed to update the information and describe concrete Brazilian initiatives to facilitate South-South cooperation to a wider audience, including policymakers working to improve food security and fight poverty. In other words, it is a manual of good practice for public authorities, technical personnel, NGOs and the general public in other Latin American, Caribbean and African countries In recent years, the world has been changing considerably. Within the many obstacles, barriers, and opportunities, three significant challenges should be considered for the future planning of our territories and cities: seeking to achieve Sustainable Development Goals (SDG), facing climate change, and performing a shift towards digitalization. Considering these three challenges, we can work toward a more sustainable future for the environment. The Handbook of Research on Sustainable Development Goals, Climate Change, and Digitalization elaborates on sustainability issues in the planning and development field regarding the environment. This text promotes understanding about the dynamics, challenges, and opportunities for the new decade regarding our common future planning. Covering topics such as circular economy, economic-ecological principles, and sustainable resilience, this book is essential for academicians, researchers, policymakers, environmentalists, scientists, technicians, decision makers, practitioners, and students. This book provides readers with a clear description of the types of lunar and interplanetary trajectories, and how they influence satellite-system design. The description follows an engineering rather than a mathematical approach and includes many examples of lunar trajectories, based on real missions. It helps readers gain an understanding of the driving subsystems of interplanetary and lunar satellites. The tables and graphs showing features of trajectories make the book easy to understand. What role do evaluations for environmental policies have in the Nordic countries (Denmark, Finland, Norway and Sweden? And could evaluations be better implemented in order to create and uphold effective and efficient

environmental policies? These are the two questions this study aims at answering. The study focuses on three main areas in regard to ex-ante and ex-post evaluations for environmental policies: Organisation, guidelines and specific evaluations. As a result of the analysis, a number of lessons learnt for the three investigated areas are found and a set of recommendations on how to improve the evaluation of environmental policies in the Nordic countries in the future are provided. The natural environment is complex and changes continuously at varying paces. Many, like the weather, we notice from day to day. However, patterns and rhythms examined over time give us the bigger picture. These weather statistics become climate and help us build an understanding of the patterns of change over the long term.

Real-Time Environmental Monitoring: Sensors and Systems introduces the fundamentals of environmental monitoring, based on electronic sensors, instruments, and systems that allow real-time and long-term data acquisition, data-logging, and telemetry. The book details state-of-the-art technology, using a practical approach, and includes applications to many environmental and ecological systems. In the first part of the book, the author develops a story of how starting with sensors, you can progressively build more complex instruments, leading to entire systems that end with databases and web servers. In the second part, he covers a variety of sensors and systems employed to measure environmental variables in air, water, soils, vegetation canopies, and wildlife observation and tracking. This is an emerging area that is very important to some aspects of environmental assessment and compliance monitoring. Real-time monitoring approaches can facilitate the cost effective collection of data over time and, to some extent, negate the need for sample, collection, handling, and transport to a laboratory, either on-site or off-site. It provides the tools you need to develop, employ, and maintain environmental monitors. Hatchback, including XTR and special/limited editions. Does NOT cover features specific to Pluriel Cabriolet, or models with SensoDrive transmission. Petrol: 1.1 litre (1124cc), 1.4 litre (1360cc) & 1.6 litre (1587cc). Turbo-Diesel: 1.4 litre (1398cc) HDi (8- & 16-valve)

This volume explores the concept of magnificence as a social construction in seventeenth-century Europe. This open access handbook, the first of its kind, provides a comprehensive and carefully curated multidisciplinary and genre-spanning view of the state of the field of Critical Menstruation Studies, opening up new directions in research and advocacy. It is animated by the central question: ““what new lines of inquiry are possible when we center our attention on menstrual health and politics across the life course?”” The chapters—diverse in content, form and perspective—establish Critical Menstruation Studies as a potent lens that reveals, complicates and unpacks inequalities across biological, social, cultural and historical dimensions. This handbook is an unmatched resource for researchers, policy makers, practitioners, and activists new to and already familiar with the field as it rapidly develops and expands. This first volume of the three-volume set (CCIS 1193, CCIS 1194, and CCIS 1195) constitutes the refereed proceedings of the First International Conference on Applied Technologies, ICAT 2019, held in Quito, Ecuador, in December 2019. The 124 full papers were carefully reviewed and selected from 328 submissions. The papers are organized according to the following topics: technology trends; computing; intelligent systems; machine vision; security; communication; electronics; e-learning; e-government; e-participation. Incorporates More Than 25 Years of Research and Experience

Railway Transportation Systems: Design, Construction and Operation presents a comprehensive overview of railway passenger and freight transport systems, from design through to construction and operation. It covers the range of railway passenger systems, from conventional and high speed inter This book constitutes the refereed proceedings of the Second International Meeting on Innovation for Systems Information and Decision meeting, INSID 2020, held in Recife, Brazil, in December 2020. Due to the COVID-19 pandemic the conference was held virtually. The 8 papers presented in this volume were carefully reviewed and selected from a total of 84 submissions to the main conference. The selected papers reflect methodological improvements

and advances in Multicriteria Decision-Making/Multicriteria Decision-Aid (MCDM/MCDA) oriented toward real-world applications and contribute to the understanding of relevant developments of current research on and future trends of Innovation for Systems Information and Decision. O Código de Processo Penal, que regula o Tribunal Popular do Júri, é datado de 1941. Desde então a sociedade brasileira sofreu inúmeras e profundas transformações e, como não poderia ser diferente, o Tribunal do Júri não mais se presta a analisar os crimes cometidos pelo "homem médio", mas sim, destina-se atualmente a julgar, em sua maioria, crimes dolosos contra a vida perpetrados em situações de guerra do tráfico de entorpecentes. Diante dessas inequívocas alterações de valores enfrentadas pela sociedade, torna-se necessário contemplar o instituto do Tribunal do Júri de acordo com as nuances da criminalidade contemporânea, de modo a evitar a derrocada desse relevante instrumento de materialização da Justiça.
