Investment pioneer Len Zacks presents the latest academic research on how to beat the market using equity anomalies. The Handbook of Equity Market Anomalies organizes and summarizes research carried out by hundreds of finance and accounting professors over the last twenty years to identify and measure equity market inefficiencies and provides self-directed individual investors with a framework for incorporating the results of this research into their own investment processes. Edited by Len Zacks, CEO of Zacks Investment Research, and written by leading professors who have performed groundbreaking research on specific anomalies, this book succinctly summarizes the most important anomalies that savvy investors have used for decades to beat the market. Some of the anomalies addressed include the accrual anomaly, net stock anomalies, fundamental anomalies, estimate revisions, changes in and levels of broker recommendations, earnings-per-share surprises, insider trading, price momentum and technical analysis, value and size anomalies, and several seasonal anomalies. This reliable resource also provides insights on how to best use the various anomalies in both market neutral and in long investor portfolios. A treasure trove of investment research and wisdom, the book will save you literally thousands of hours by distilling the essence of twenty years of academic research into eleven clear chapters and providing the framework and conviction to develop market-beating strategies. Strips the academic jargon from the research and highlights the actual returns generated by the anomalies, and documented in the academic literature. Provides a theoretical framework within which to understand the concepts of risk adjusted returns and market inefficiencies. Anomalies are selected by Len Zacks, a pioneer in the field of investing. As the founder of Zacks Investment Research, Len Zacks pioneered the concept of the earnings-per-share surprise in 1982 and developed the Zacks Rank, one of the first anomaly-based stock selection tools. Today, his firm manages U.S. equities for individual and institutional investors and provides investment software and investment data to all types of investors. Now, with this new book, he shows you what it takes to build a quant process to outperform an index based on academically documented market inefficiencies and anomalies. Evidence-Based Technical Analysis examines how you can apply the scientific method, and recently developed statistical tests, to determine the true effectiveness of technical trading signals. Throughout the book, expert David Aronson provides you with comprehensive coverage of this new methodology, which is specifically designed for evaluating the performance of rules/signals that are discovered by data mining. This handbook serves as a guide to deploying battery energy storage technologies, specifically for distributed energy resources and flexibility resources. Battery energy storage technology is the most promising, rapidly developed technology as it provides higher efficiency and ease of control. With energy transition through decarbonization and decentralization, energy storage plays a significant role to enhance grid efficiency by alleviating volatility from demand and supply. Energy storage also contributes to the grid integration of renewable energy and promotion of microgrid. A Trader's First Book on Commodities is guaranteed to shorten the learning curve for beginning traders while offering seasoned traders a new perspective on familiar topics. There's more to trading than oscillators and trendlines; profitable trading is only possible in a conducive environment (brokerage, platform, mindset, support, and awareness). This is a directory of companies that grant franchises with detailed information for each listed franchise. Wall Street is where poker and modern finance? and the theory behind these "games"? clash head on. In both worlds, real risk means real money is made or lost in a heart beat, and neither camp is always rational with the risk it takes. As a result, business and financial professionals who want to use poker insights to improve their job performance will find this entertaining book a "must read." So will poker players searching for an edge in applying the insights of risk-takers on Wall Street. A leading educator makes Forex investing as easy as driving a car. In The Forex Trading Manual, Javier Paz provides easy-to-understand examples of long- and short-term strategies, best practices for navigating the economic calendar, and applications for trading a variety of currencies. To make this complex subject simple, he draws analogies between the different steps of trading in this market to the steps of turning on and driving a car. You'll learn: Need-to-know facts about the Forex market. Effective trading strategies. Ways to build a coherent Trading Plan. Everything you need to know about return on investment and risk. Javier Paz founded FX Briefing, a boutique research firm serving institutional investors, corporate finance officials, and members of governments. In 2007, he launched ForexDataSource.com, which helps Forex traders make better choices. Paz is the creator of the FX Hound and mktNus fx technology, the broker dealer ranking methodology, and of forecasting models such as the Fundamental Market Value (FMV) of currencies. Optimization models play an increasingly important role in financial decisions. This is the first textbook devoted to explaining how recent advances in optimization models, methods and software can be applied to solve problems in computational finance more efficiently and accurately. Chapters discussing the theory and efficient solution methods for all major classes of optimization problems alternate with chapters illustrating their use in modeling problems of mathematical finance. The reader is guided through topics such as volatility estimation, portfolio optimization problems and constructing an index fund, using techniques such as nonlinear optimization models, quadratic programming formulations and integer programming models respectively. The book is based on Master's courses in financial engineering and comes with worked examples, exercises and case studies. It will be welcomed by applied mathematicians, operational researchers and others who work in mathematical and computational finance and who are seeking a text for self-learning or for use with courses. In his first book, A Complete Guide to Technical Trading Tactics, John Person introduced traders to the concept of integrating candlestick charting with pivot point analysis. Now, in Candlestick and Pivot Point Trading Triggers, he goes a step further and shows you how to devise your own setups and triggers—in the stock, forex, and futures markets—based on a moving average approach. Note: Website and other supplementary materials are not included as part of eBook file. This is a directory of companies that grant franchises with detailed information for each listed franchise. Pratiyogita Darpan (monthly magazine) is India's largest read General Knowledge and Current Affairs Magazine. Oliver Velez, co-founder of Pristine.com and current CEO of Velez Capital Management, is renowned for his effective trading skills and specialized knowledge in technical analysis. His educational seminars are sought after by traders and often attended multiple times to extract every piece of wisdom from his presentations. Now, one of his most legendary sessions jumps from the screen into your hands in this coursebook of Velez's famed Swing Trading techniques. With detailed text and a vivid 90-minute DVD, you'll explore and master a highly profitable niche that exploits the two- to five-day holding period – a method too brief for large institutions, too lengthy for day traders, yet perfectly suited for individual investors with a mind towards success. In his captivating, high-energy style, Velez shows

you how to: Spot opportunities using proven swing trading criteria; Define periods of market uncertainty and make the right moves; Discover key set-ups and effectively use moving averages; Read charts successfully, especially Japanese Candlesticks; Win by going against conventional trading wisdom; Understand and profit from understanding market psychology. Only in this book/DVD course combination will you be able to fully absorb the wealth of material that Oliver Velez is set up to offer. The easy-to-understand definitions and eye-opening self-tests bring the information to you and the power to your trades. Don't end up on the wrong side of the market. Swing Trading is the perfect tool for the investor who wants to understand the forces that shape the trading arena. This presentation has been viewed live and on DVD by hundreds of thousands of traders. Now you can use this course to rise above the impulse of novice traders. It's the best way to master the cycles and win consistent profits. Reveals the proprietary framework used by an exclusive community of top money managers and value investors in their never-ending quest for untapped investment ideas

Considered an indispensable source of cutting-edge research and ideas among the world's top investment firms and money managers, the journal *The Manual of Ideas* boasts a subscribers list that reads like a Who's Who of high finance. Written by that publication's managing editor and inspired by its mission to serve as an "idea funnel" for the world's top money managers, this book introduces you to a proven, proprietary framework for finding, researching, analyzing, and implementing the best value investing opportunities. The next best thing to taking a peek under the hoods of some of the most prodigious brains in the business, it gives you uniquely direct access to the thought processes and investment strategies of such super value investors as Warren Buffett, Seth Klarman, Glenn Greenberg, Guy Spier and Joel Greenblatt. Written by the team behind one of the most read and talked-about sources of research and value investing ideas

Reviews more than twenty pre-qualified investment ideas and provides an original ranking methodology to help you zero-in on the three to five most compelling investments

Delivers a finely-tuned, proprietary investment framework, previously available only to an elite group of TMI subscribers

Step-by-step, it walks you through a proven, rigorous approach to finding, researching, analyzing, and implementing worthy ideas

This book constitutes the refereed proceedings of the 1st International Congress on Blockchain and Applications 2021, BLOCKCHAIN'21, held in Salamanca, Spain, in October 2021. Among the scientific community, blockchain and artificial intelligence are a promising combination that will transform the production and manufacturing industry, media, finance, insurance, e-government, etc. Nevertheless, there is no consensus with schemes or best practices that would specify how blockchain and artificial intelligence should be used together. The 38 full papers presented were carefully reviewed and selected from over 44 submissions. They contain the latest advances on blockchain and artificial intelligence and on their application domains, exploring innovative ideas, guidelines, theories, models, technologies, and tools and identifying critical issues and challenges that researchers and practitioners must deal with in future research.

'Dazzling...Pinker's big idea is that language is an instinct...as innate to us as flying is to geese...Words can hardly do justice to the superlative range and liveliness of Pinker's investigations' - Independent

'A marvellously readable book...illuminates every facet of human language: its biological origin, its uniqueness to humanity, its acquisition by children, its grammatical structure, the production and perception of speech, the pathology of language disorders and the unstoppable evolution of languages and dialects' - Nature

Te gustaría dejar de trabajar o reducir tu jornada laboral? ¿Deseas alcanzar la independencia financiera? ¿Hay personas que viven de la bolsa solo con dos horas de trabajo al día? ¿Cómo lo consiguieron? ¿Podría ser yo uno de ellos? ¿Qué inversión inicial requiere convertirme en operador bursátil intradiario? Si no quieres pasarte la vida trabajando... aquí están las respuestas que buscabas. «No trabajes por dinero, haz que el dinero trabaje para ti». Bienvenido al mejor trabajo del mundo.

The first swap was executed over thirty years ago. Since then, the interest rate swaps and other derivative markets have grown and diversified in phenomenal directions. Derivatives are used today by a myriad of institutional investors for the purposes of risk management, expressing a view on the market, and pursuing market opportunities that are otherwise unavailable using more traditional financial instruments. In this volume, Howard Corb explores the concepts behind interest rate swaps and the many derivatives that evolved from them. Corb's book uniquely marries academic rigor and real-world trading experience in a compelling, readable style. While it is filled with sophisticated formulas and analysis, the volume is geared toward a wide range of readers searching for an in-depth understanding of these markets. It serves as both a textbook for students and a must-have reference book for practitioners. Corb helps readers develop an intuitive feel for these products and their use in the market, providing a detailed introduction to more complicated trades and structures. Through examples of financial structuring, readers will come away with an understanding of how derivatives products are created and how they can be deconstructed and analyzed effectively.

The biennial European Conference on Machine Learning (ECML) series is intended to provide an international forum for the discussion of the latest high quality research results in machine learning and is the major European scientific event in the field. The eleventh conference (ECML 2000) held in Barcelona, Catalonia, Spain from May 31 to June 2, 2000, has continued this tradition by attracting high quality papers from around the world. Scientists from 21 countries submitted 100 papers to ECML 2000, from which 20 were selected for long oral presentations and 23 for short oral presentations. This selection was based on the recommendations of at least two reviewers for each submitted paper. It is worth noticing that the number of papers reporting applications of machine learning has increased in comparison to past ECML conferences. We believe this fact shows the growing maturity of the field. This volume contains the 43 accepted papers as well as the invited talks by Katharina Morik from the University of Dortmund and Pedro Domingos from the University of Washington at Seattle. In addition, three workshops were jointly organized by ECML 2000 and the European Network of Excellence - net: "Dealing with Structured Data in Machine Learning and Statistics Websites", "Machine Learning in the New Information Age", and "Meta-Learning: Building Automatic Advice Strategies for Model Selection and Method Comparison". This volume constitutes the refereed proceedings of the 12th International Conference on Hybrid Artificial Intelligent Systems, HAIS 2017, held in La Rioja, Spain, in June 2017. The 60 full papers published in this volume were carefully reviewed and selected from 130 submissions. They are organized in the following topical sections: data mining, knowledge discovery and big data; bioinspired models and evolutionary computing; learning algorithms; visual analysis and advanced data processing techniques; data mining applications; and hybrid intelligent applications.

The Manual sets out an internationally agreed framework for the compilation and reporting of statistics on international trade in services in the broad sense. It addresses the growing need, including in international trade negotiations and agreements, for more detailed, comparable, and comprehensive statistics on this type of trade in its various forms. The recommendations will enable countries to progressively expand and structure the information they compile in an internationally comparable way. The Manual conforms with and explicitly relates to the System of National Accounts 1993 and the fifth edition of the IMF's Balance of Payments Manual. It is published jointly by the United Nations, European Union, IMF, OECD, UNCTAD, and World Trade Organization.

Chapter 8. Debugging h2; Web Browser Developer Tools; Chrome Developer Tools; Firefox Developer Tools; Debugging h2 on iOS Using Charles Proxy; Debugging h2 on Android; WebPagetest; OpenSSL; OpenSSL Commands; nghttp2; Using nghttp; curl; Using curl; h2i; Wireshark; Summary; Chapter 9.
