The technical problems confronting different societies and periods, and the measures taken to solve them form the concern of this annual collection of essays. Volumes contain technical articles ranging widely in subject, time and region, as well as general papers on the history of technology. In addition to dealing with the history of technical discovery and change, History of Technology also explores the relations of technology to other aspects of life -- social, cultural and economic -- and shows how technological development has shaped, and been shaped by, the society in which it occurred. Published 1900-6, this highly illustrated two-volume work contains copious technical detail regarding the early history of the motor car. This is the first systematic assessment of the international 200-mile exclusive economic zone. To date, 145 states have ratified the Law of the Sea Convention, and most have established EEZs. This volume focuses on the specific nature of the EEZ and the construction and evolution of institutions stemming from its introduction, specifically examining developments at local, national and international levels. In Asia, the fisheries sector is important in terms of food security, livelihoods and foreign exchange earnings. However, as in many parts of the world, there are signs that capture fisheries are fully exploited or overfished. Management of fisheries in the region is often hampered by lack of information on the status of fisheries in terms of biological, social, economic, policy and governance aspects. This regional project documents an alarming decline on coastal fishery resources, based on historic research surveys in South and Southeast Asia. Socio-economic analyses and policy reviews highlight the importance of the fisheries sector but also the challenges facing it. Potential interventions to improve fisheries management in the countries are outlined and defined with environmental, socioeconomic and institutional objectives. The story of one of MG's earliest sport saloons. The book covers the development of the XPAG engine as well as other mechanical information.
